DETAILED ACTION

1. In the **AMENDMENT AND REQUEST FOR RECONSIDERATION** dated 9/8/2003 applicants have canceled claims 1-85 and added new claims 86-94.
2. Claims 86-94 are under consideration in this Office Action.

Claim Rejections - 35 U.S.C. § 112, 1st Paragraph

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:
The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
4. Claims 86-94 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims encompass the claimed method using any protein of any amino acid sequence which comprises SEQ ID NO: 5, 8, or 9 or fragment thereof. The specification discloses that PNRC (proline-rich nuclear receptor co-regulatory protein) has an amino acid sequence of 327 amino acid residues (SEQ ID NO: 8). The amino acid sequence of SEQ ID NO: 5 which consists of seven amino acid residues was identified as a binding motif in the disclosed PNRC having the amino acid sequence of SEQ ID NO: 8. The amino acid sequence of SEQ ID NO: 9 is disclosed as consisting of 23 amino acid residues which comprises SEQ ID NO: 5.

However, the specification does not provide a written description of any protein comprising SEQ ID NO: 5, 8, 9, or fragment thereof because the specific amino acid sequence that is N-terminal and C-terminal to SEQ ID NO: 5, 8, 9, or fragment thereof and the specific function has not been described. The specification does not provide any structural characteristics or properties for the protein other than comprising SEQ ID NO: 5, 8, 9, or fragment thereof for which no predictability of structure or function is apparent. Applicants have failed to sufficiently describe the claimed invention, in such full, clear, concise, and exact terms that a skilled artisan would recognize Applicants were in possession of the claimed invention.

Amending the claims to recite a PRNC molecule comprising SEQ ID NO: 8 or SEQ ID

Art Unit: 1652

NO: 9, wherein said PRNC molecule contains the binding sequence of SEQ ID NO: 5, may overcome the rejection.

Conclusion

5. No claim is allowed.

6. Applicants' amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
